OBJECTIVE

12+ years of hands-on experience in designing, developing, and maintaining robust and scalable software solutions. Proficient in a wide range of technologies and frameworks. As a forward-thinking professional, I am passionate about staying up-to-date with emerging technologies and methodologies to drive innovation and continuous improvement. Looking for a challenging role where I can use my extensive experience and technical abilities to contribute to the success of dynamic projects and members of the mentoring team

EDUCATION

Bachelor of Technology in Computer Science, Uttar Pradesh Technical University **2006 - 2010**

SKILLS

Technical Skills	Java 21, Spring Boot, Spring Eco System, Micro Services, Typescript ReactJs, MongoDB, PostgreSQL, Tailwind CSS GitLab, Kanban board, JIRA Confluence, Jenkins, Docker, Unix, AWS
Soft Skills	English, German (B1 Learning)

CURRENT APPROACH

- Utilizing Java 21 and Spring Boot frameworks to design and develop highly efficient and scalable back-end micro-services, ensuring seamless integration with front-end systems and external APIs.
- Agile development methodologies, adept at translating user stories into well-defined features and iterative development cycles, fostering collaboration
- Continuous Integration and Continuous Delivery (CI/CD) pipelines, automating build, test, and deployment processes to achieve rapid and reliable software delivery
- AWS cloud services for infrastructure, used Terraform to manage cloud
- Test-driven development (TDD), writing comprehensive unit and integration tests to ensure the quality

EXPERIENCE

Lead Developer Tech Mahindra GmbH	Sep 2021 - Present Berlin, Germany
---	---------------------------------------

- Micro-services implementation in spring boot.
- 70 coding, code analysis, code testing, code review, etc
- Understand Business requirements and put them into technical stories
- Finalize the effective solution for business requirements
- Analyse the technical feasibility and solution for the requirements

Lead Developer Nomura Services Pvt Ltd	March 2018 – Sep 2021 Mumbai, India
--	--

- Designing micro-services in Spring boot
- Designing Front end in ReactJs - consuming services.
- Understanding business requirements.
- Managing code

Senior Software Engineer

Teradata Labs

Jan 2017 – March 2018

Hyderabad, India

- Designing micro-services in Spring boot
- Client request analysis

Technology Specialist

Wells Fargo

July 2014 – December 2016

Hyderabad, India

- Completely fresh project from scratch following agile approach using Java/ Spring
- Requirement understanding, designing prototypes, Developing code, Testing new tech.

Software Engineer

HSBC Bank

May 2012 – July 2014

Hyderabad, India

- Risk management, Compliance, User stories analysis and creation

PROJECTS

InLife commerce(ILC) Inlife commerce is an application developed for customer service agents of Telefonica to facilitate the existing customer with a hassle-free extension of contract or a new suitable contract offer based on customer need.

Monju Monju is Nomura Market Risk Calculation engine that calculates and reports MR Basel 2.5 regulations, servicing reporting requirements laid down by JFSA PRA FSA, etc
